About the Fun Run results

The run itself was popular and quite spectacular; it was heartening to see so many people enjoying themselves.

However, getting a coherent set of results has proved a challenge.

Particular problems seem to have arisen from these factors:

- The sheer size of the entry in a small circuit;
- Misallocation of three pairs of numbers on the day, prior to the run
- Leaving the finish and/or re-joining perhaps for photos with friends and family

In the actual results as first collated, there are surprisingly few duplicated bib numbers, and the legibility of bib records is good: in these cases we have credited the earlier records

Times shown are actual times recorded at key positions through the finish. The normal font times are as recorded, the italic font times are incremental between actual times.

We are not aware of missing any runner in the result set.

The vast majority of the entrants were administered and organised by their schools, so runners/non-runners are not recorded by Rotherham 10k

If you think any participant is missing, or misplaced, please let us know so we can follow up.

We might be able to make a correction if you can give any information as follows:

- Name of participant
- Bib number they ran in
- Any other participant{s} they were near at the finish
- Any photographs taken during the Fun Run especially near the finish

Whether for that purpose or not, we will happily display any photos from the event if forwarded to us.

Thank you for contributing to a memorable and enjoyable event.
